Ingredients of ProDentim

ProDentim's effectiveness comes from its carefully crafted formula, which includes a blend of natural ingredients and probiotics. Here's a breakdown of the key ingredients:

1. **Lactobacillus Paracasei**

This probiotic strain is known for its ability to support gum health and reduce inflammation. It helps prevent the growth of harmful bacteria that can cause dental issues like gingivitis and periodontitis.

2. **Lactobacillus Reuteri**

Lactobacillus Reuteri has anti-inflammatory properties that aid in reducing gum swelling and bleeding. It also promotes a healthy balance of good bacteria in the mouth, keeping harmful bacteria in check.

3. **Bifidobacterium Lactis BL-04®**

Bifidobacterium Lactis is a probiotic that supports the immune system and helps reduce the frequency of cavities. It also promotes digestive health, which is closely linked to oral health.

4. **Inulin**

Inulin is a prebiotic that feeds the beneficial bacteria in your gut and mouth. By supporting the growth of probiotics, Inulin helps maintain a healthy oral microbiome and keeps bad bacteria at bay.

5. **Malic Acid**

Found naturally in fruits like apples, malic acid is known for its ability to whiten teeth and improve skin health. In ProDentim, it contributes to maintaining a brighter, whiter smile.

6. **Peppermint**

Peppermint has been used for centuries in oral care due to its natural antibacterial properties. It freshens breath and helps prevent bad bacteria from thriving in the mouth.

7. **Tricalcium Phosphate**

Tricalcium Phosphate is essential for maintaining strong teeth and bones. It helps in remineralizing the teeth and protecting the enamel from damage caused by acid erosion.
